archanaverma.gogna@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | Delhi, India

PROFESSIONAL SUMMARY

Third-year B.Tech student in Electronics and Communication Engineering in specialization with Artificial Intelligence at Indira Gandhi Delhi Technical University for Women (IGDTUW) with hands-on experience in full-stack web development through a startup internship and multiple hackathon projects. Skilled in building responsive web applications, developing REST APIs, and integrating frontend with backend systems. Currently strengthening problem-solving skills through Data Structures and Algorithms in C++ while expanding knowledge in AI and Machine Learning through academic coursework and independent projects.

EDUCATION

Indira Gandhi Delhi Technical University for Women (IGDTUW)

2024 – 2028

B.Tech, Electronics and Communication Engineering in Specialization with Artificial Intelligence | CGPA: 8.28/10

TECHNICAL SKILLS

Languages: C++, Python, JavaScript

Frontend: React, HTML, CSS, Tailwind CSS

Backend: Node.js, Express.js, REST APIs

Database: MongoDB, MongoDB Atlas

AI / ML: PyTorch, Torchvision, Pillow

Tools: Git, GitHub, VS Code, Postman, Figma, Vercel

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, Client–Server Architecture, Computer Vision (Academic & Project Exposure)

EXPERIENCE

Full-Stack Web Development Intern — Auli Cafe (Startup)

Jun 2025 – Jul 2025

- Developed a full-stack website with responsive user and admin modules using React, Node.js, Express.js, MongoDB, and Tailwind CSS.
- Built backend REST APIs and integrated frontend with backend for efficient content and data management.
- Collaborated with the startup team to translate business requirements into functional website features.
- Tested, debugged, and refined website functionality to improve usability and overall user experience.

PROJECTS

Smart Traffic Signal Optimization System — Team Lead (SIH)

[Github](#)

Python • OpenCV • Arduino

- Led a team in developing an intelligent traffic signal prototype that adjusts signal timing based on real-time vehicle density.
- Implemented ambulance priority detection to improve emergency response at intersections.
- Coordinated project planning and technical implementation, resulting in college-level selection for Smart India Hackathon (SIH) 2025.

CivicFix — ML-Based Civic Issue Detection Platform

[Github](#)

Python • Node.js • MongoDB

- Developed an ML-powered web platform capable of detecting potholes, road damage, broken streetlights, and water leaks from uploaded images using a custom-trained image classification model.
- Contributed to the backend development of the complaint management system using **Node.js** and **MongoDB**, supporting complaint storage, status updates, and integration with the ML module.

AI-Powered Career Assistant Platform

[Github](#)

JavaScript • OpenAI API

- Developed a web platform that analyzes resumes, generates personalized learning roadmaps, and provides AI-assisted interview preparation.
- Designed user workflows to deliver practical guidance through resume analysis, chatbot interaction, and mock interview features.

ACHIEVEMENTS & CERTIFICATIONS

- Smart India Hackathon (SIH) 2025 — Selected at College Level, Team Lead.
- Top 30 Finalist — "Innovate4Humanity" Hackathon, NSUT.
- Top 45 Finalist — "Hacknovate 6.0" Hackathon, ABES Institute of Technology.
- Cleared the Texas Instruments 2026 WiSH Program online assessment, shortlisted for interview round.

POSITION OF RESPONSIBILITY

Event Management Volunteer — Taarangana (Annual College Cultural Fest), IGDTUW

2025

- Coordinated event logistics, stall management, and on-ground operations during the university's annual college cultural fest.

SOFT SKILLS

Problem-Solving, Creativity, Teamwork, Clear Communication.
